

- **Much longer shelf-life and fail safe at point of application as a result of a double property**
 - Zero air suck-back, regardless of the pressure gradient
 - Zero germ during Filling
 - No Residue left in the valve, therefore no germ ingress even after dispensing in a broth of Puss
- **No refrigeration needed, proven with Infant Formula (the most sensitive nutritional liquid)**
 - No cold chain management required
 - Low carbon footprint
- **Contamination free**
 - Enables preservative-free formulations
- **Improved dispensing**
 - Metered dose
